Cue Brands Overview

McDermott cues and performance shafts are some of the most recognized products in the billiard industry. Manufactured in Menomonee Falls, WI, McDermott cues are known for quality construction, exotic woods, intricate inlays and limitless customization options. Proudly made in the U.S.A., these cues are covered by a lifetime warranty (including warpage), as well as McDermott's lifetime maintenance plan.

Star cues feature premium maple and exotic materials mixed with intricate 4-color overlays. Manufactured globally using McDermott's technology, Star cues provide the highest quality hit in their price range. Star cues are designed, engineered and exclusively distributed by McDermott Cue. They are covered by a limited lifetime warranty.

Lucky cues feature premium maple and intricate graphic overlays. This provides you with an exceptional value for one of the most solid-hitting, globally-manufactured cues in the industry. Lucky cues are designed, engineered and exclusively distributed by McDermott Cue. They are covered by a three-year limited warranty.

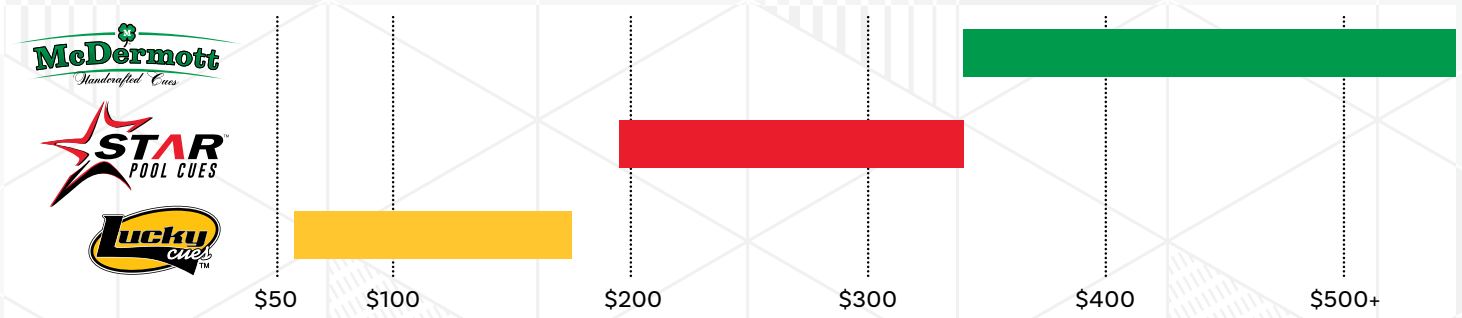

Cue Brands Comparison

McDermott offers over 200 unique cue models incorporated into three distinct cue brands.

Use the charts below to analyze the features and specifications of each brand to help determine which is right for you!

PRICE RANGE

FEATURES & SPECS

SHAFT	Defy, i-Pro, i-Shaft, G-Core or North American Grade AA hardrock maple. Snooker & Carom shafts also available.	North American Grade AA maple	North American Grade A maple
SHAFT TAPER	Pro, European, i-Pro Hybrid, i-Pro Hybrid Slim, Defy Hybrid & Break	Pro	Traditional
SHAFT FINISH	Micro-burnished, sealed, waxed and polished	Sealed, waxed and polished	Sealed, waxed and polished
TIP	Navigator or Everest	Premium or laminated leather	Premium leather
FINISH	Ultra-violet Electrostatic 5-coat finish	High-luster urethane	Urethane
BUTT PLATE	Impact-resistant high-tech urethane, stainless steel or Engage butt plate	Stainless steel or pearl	High-strength PC
JOINT	3/8"-10 or patented stainless steel Quick Release	3/8"-10	3/8"-10
JOINT COLLAR	High-tech urethane or stainless steel, hand-glued and screwed	Stainless steel	High-strength PC
WOOD TYPES	Over 15 premium exotic woods from around the world	Hardrock maple, birdseye maple and exotic woods	Hardrock maple
EXOTIC INLAY MATERIALS	Turquoise, abalone, mother-of-pearl, pewter, brass and more	Pearl	No
WRAPS	Double-pressed & sealed Irish linen, premium leather or cork	Irish linen	Irish linen or textured wrap
INLAYS	Handcrafted precision milled to .001"	Yes	No
RINGS	Metal, wood, pearl and index	Metal, pearl and index	Metal, overlay and index
TRANSFERS/OVERLAYS	6-color lithograph transfer images	4-color intricate overlays	Multi-color overlays
CUSTOMIZATIONS AVAILABLE	Design, color, weight, length, shaft diameter, wrap, joint, engraving	Weight, shaft diameter, wrap, engraving	Weight, shaft diameter, wrap, engraving
MAINTENANCE PROGRAM	Yes	No	No
MANUFACTURED	Menomonee Falls, WI USA	Globally	Globally
WARRANTY	Lifetime, including warpage	Limited lifetime, excluding warpage	Three-year limited, excluding warpage

MACH 1

CARBON FIBER BREAK CUE

FEATURING OUR
VBP WEIGHT SYSTEM

Introducing the Vanquish Mach 1 – our most technologically-advanced break cue. This state-of-the-art carbon fiber butt features our patented Variable Balance Point technology, which allows you to fine tune the weight and balance of your cue. This allows you to set the cue to be front-weighted, rear-weighted or anywhere in between! The Mach 1 comes equipped with our newly-engineered Defy break shaft with a Navigator Break Impact tip and phenolic ferrule for maximum power and control.

PHENOLIC
FERRULE

NAVIGATOR
BREAK IMPACT

Navigator Break Impact is a hybrid phenolic break tip. Most phenolic tips are designed to generate power, but at the cost of cue ball control. The Break Impact's hybrid construction provides tremendous cue ball control without sacrificing power.

VBP WEIGHT SYSTEM

CARBON FIBER

The Mach 1 utilizes a carbon fiber butt construction that features our patented Variable Balance Point technology.

BENEFITS: Promotes straightness and stabilizes the entire cue for absolute control and predictability.

ADJUSTABLE WEIGHT BOLTS

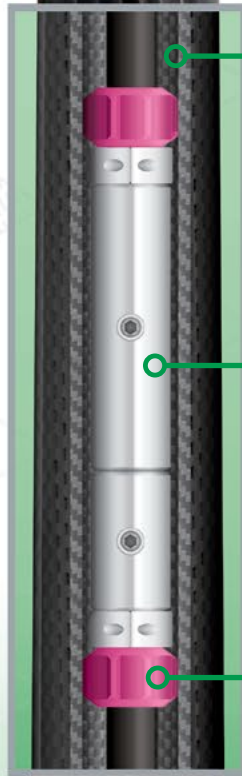

WHAT THEY DO: These specialized weight bolts can be placed anywhere on our internal rail system within the cue.

BENEFITS: Provides you with complete control over both the weight and balance point of your cue.

VBP STABILIZERS

WHAT THEY DO: Dampen noise and vibration.

BENEFITS: Drastically reduces vibration that is inherent in traditional cues, providing you with a more solid hit.

Available in linen, leather & no-wrap options!

What Makes a McDermott?

Since our start in 1975, we've been continuously improving our cues to ensure that McDermott always reigns supreme. However, one thing never changes: our commitment to quality. That's why we stand behind every McDermott cue with a lifetime warranty, including coverage for warping.

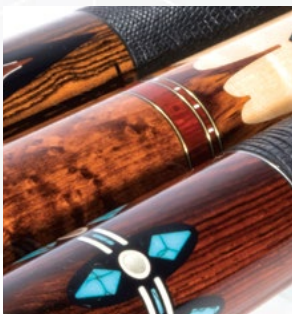

The Wood

We hand select only the finest woods from around the globe. The wood is aged for 18 to 24 months by alternately storing and machining each piece three times. This allows the perfect amount of moisture to escape, ensuring absolute straightness.

The Joint

Our signature 3/8"-10 wood-to-wood and patented Quick Release (QR) joints provide consistent surface contact throughout the cue, delivering maximum feel and the most solid hit in the industry.

The Finish

McDermott cues are hand-stained with our exclusive stains made from the finest pigments in the world. Superior to the synthetic stains generally used in the industry, it's notable for uniform saturation of the wood and color consistency. Five coats of high-luster urethane protect the cue and enhance the color.

The Wrap

PREMIUM LEATHER

Our premium leather wraps offer the comfort, durability and consistency that can only be found in leather. Check out our leather options on **PAGE 57**.

GENUINE IRISH LINEN

Our genuine imported Irish linen wraps are tightly wound, double-pressed and polished for a perfect fit and smooth feel. Irish linen absorbs hand moisture to ensure a comfortable grip.

NO-WRAP HANDLE

For players that prefer a cue without a wrap, we offer several no-wrap models. We can also customize wrapped cue models to have no-wrap handles.

How McDermott Cues Are Made

Have you ever wondered how pool cues are made? Join us on a tour of our production facility where you'll learn our step-by-step cue-making process! Watch now at mcdermottcue.com/factorytour

Make it your way.

Craving an original showstopper? Do you think one of our cues would look better with bocote instead of cocobolo; green burl instead of turquoise; pewter instead of brass? Any of our current regular cue models can be customized with our exotic woods and materials. Choose one of our current McDermott cue models and substitute any of our materials to create your custom cue.

See our customization options - including more stain, paint and wrap colors - on **PAGE 56**.

DEFY

THE MOST ADVANCED CARBON FIBER SHAFT EVER.

Defy gives you the unparalleled accuracy and control that you expect from carbon fiber, but uses state-of-the-art technologies to shatter its limitations. SmacWrap, originally designed for the aerospace industry, absorbs vibration and dampens noise resulting in a confident hit with a soft feel and quiet sound. Our super-smooth coating reduces friction, allowing the shaft to glide through your fingers with ease like a wood shaft. Only Defy's insane energy transfer and accuracy will remind you that you're using a carbon fiber shaft.

NEW AND IMPROVED!

Our newly-engineered Defy shaft has a brand new finish that allows it to glide through your hands more smoothly than ever before!

It also features a new ferrule material for enhanced durability.

NAVIGATOR
Automatic (Soft)

Navigator Automatic tips feature pure Japanese pigskin leather with no artificial coloring added. Each tip goes through a month-long manufacturing process that seals in the ideal qualities of the leather, providing a softer, more consistent hit with almost no deformation.

Shaft Comparison

i-PRO ORIGINAL

i-Pro Hybrid taper

12.5mm

Starting at
\$480

i-PRO SLIM

i-Pro Slim Hybrid taper

12mm

Starting at
\$480

The i-Pro and i-Pro Slim take your game to a whole new level with unparalleled performance and consistency. Their Octadic Laminated Construction, combined with a Triple-Layer Carbon Fiber Core, makes the i-Pro and i-Pro Slim the most radial consistent wooden shafts we've ever made. This unique design also maximizes energy transfer, allowing you to generate a higher spin rate while hitting closer to center cue ball.

The i-Pro Slim features a smaller, 12mm tip diameter and a slimmer taper for enhanced feedback.

Navigator Alpha Pro Tip (Max)

Navigator Alpha tips feature multiple layers of Japanese pigskin leather that are bonded, then compressed for three minutes. This process results in a tip that mushrooms less and provides a firm and crisp hit. The base layers have a different density, allowing them to act like a bumper. This reduces pressure on the tip and helps protect the ferrule.

Carbon fiber placement in i-Pro & i-Pro Slim:

i-3 SHAFT

European taper

11.75mm

Starting at
\$345

The i-3 is designed for incredible spin and finesse. It is engineered for highly-skilled players who have great control of their stroke mechanics and are looking for more cue ball action.

Navigator Blue Impact Pro Tip (Max)

Within the Navigator tip line, Blue Impact Pro is slightly on the harder end of the scale and was created through a proprietary process of adjusting the leather fiber firmness in each layer. The lower compression of the leather will minimize grip force (contact time on the cue ball), which increases cue ball speed and acceleration.

Carbon fiber placement in i-3 shaft:

i-2 SHAFT

Pro taper

12.75mm

Starting at
\$345

The i-2 is known for its incredible control and consistency. It is the perfect all-around performance shaft designed for players that want maximum control without sacrificing power and finesse. The i-2 comes standard on McDermott G-Series cues \$1,100 and up.

Navigator Blue Impact Pro Tip (Max)

Within the Navigator tip line, Blue Impact Pro is slightly on the harder end of the scale and was created through a proprietary process of adjusting the leather fiber firmness in each layer. The lower compression of the leather will minimize grip force (contact time on the cue ball), which increases cue ball speed and acceleration.

Carbon fiber placement in i-2 shaft:

i-1 BIG BOY BREAK/JUMP SHAFT

Strong break/jump taper

13.25mm

Starting at
\$345

The i-1 Big Boy is the most powerful shaft in the i-Shaft series. Its special taper, wider shaft diameter and Triple-Layer Carbon Fiber core make it the ideal choice for breaking and jumping with extreme control.

Navigator Break Impact Tip

The Navigator Break Impact is a hybrid phenolic break tip. Most phenolic tips are designed to generate power, but at the cost of cue ball control. The Break Impact tip's hybrid construction provides tremendous cue ball control without sacrificing power. This makes it ideal for breaking and jump shots.

Carbon fiber placement in i-1 Big Boy shaft:

G-CORE SHAFT

Pro taper

13mm

Starting at \$215

The G-Core shaft is a perfect blend of modern technology and classic feel. It has the benefits of carbon fiber core technology with the familiar feel of a traditional maple shaft. G-Core shafts comes standard on McDermott G-Series cues \$420-\$1,090.

Navigator Black Tip (Medium)

Navigator Black tips feature multiple layers of Japanese pigskin leather that are assembled using a proprietary adhesive. This prevents oxidation, meaning the tip won't get harder after short usage. They are most adaptable tips in the Navigator line, allowing players to shape and mold the tip over time to fit their play style.

Carbon fiber placement in G-Core shaft:

Traditional MAPLE SHAFT

Pro taper

13mm

Starting at \$120

Traditional maple shafts are made with the finest North American Grade AA hardrock maple wood. This shaft is designed for players who want the classic feel and performance at an affordable price. The traditional maple shaft comes standard on McDermott GS-Series cues.

Everest® Tip by Tiger (Medium)

Each Everest® laminated tip is individually tested for consistency, hardness and quality. It shapes like a hard tip, hits like a medium, but has the control of a soft tip. Everest® tips have 10 layers that include a red warning layer to indicate when it needs replacement.

STINGER BREAK/JUMP SHAFT

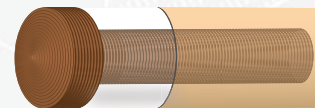

13.25mm

Starting at \$165

Stinger technology takes the hit energy to the center of the shaft, regardless of where you hit the tip. Our tip can be shaped flatter than a typical break cue's tip. The flatter profile causes the Stinger tip to have a huge "sweet spot." You can mishit and still get the result you intended.

PATENTED Stinger Phenolic Tip/Ferrule Technology

The tip features a "stinger" stem that projects downward through a hole in the center of the ferrule. On impact, the shock of the hit goes to the center of the tip and down the stinger stem, transmitting the impact directly to the center of the shaft. This results in a very efficient, precise hit.

Short Break/Jump Taper 13.25mm phenolic tip

SLEDGEHAMMER BREAK SHAFT

13.25mm

Starting at \$165

Sledgehammer is one of the most recognized and respected names in dedicated break cues. The patented ferrule technology transfers energy unlike other shafts on the market. This gives you insane power and superior accuracy. Known to many as the hardest and most solid hitting break cue on the market, the Sledgehammer simply destroys a rack, leaving your competition speechless.

Short Break/Jump Taper 13.25mm phenolic tip

iPRO & iPRO SLIM

HIGH-PERFORMANCE SHAFTS

Octadic Laminated Shaft Construction

The i-Pro and i-Pro Slim feature eight spliced pieces of premium maple that are bonded together to form our most radial consistent wooden shafts yet. This construction method drastically reduces the performance inconsistencies caused by natural wood grain and maximizes energy transfer from the shaft into the cue ball at impact.

WHAT IT DOES:

- Stabilizes the entire shaft for absolute control & predictability
- Generates more spin while hitting closer to center cue ball
- Increased accuracy at low & high speeds

Learn more about the i-Pro & i-Pro Slim at mcdermottcue.com/ipro

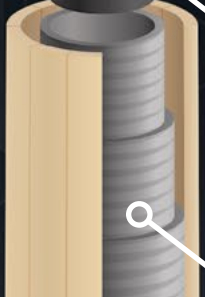

Navigator Alpha Pro Max Tip

Navigator Alpha Pro Max tips feature an enhanced 9-layer Japanese Pig leather construction that includes a specially-formulated bottom layer. The harder leather at the base of the tip improves stability and enhances feedback, while decreasing tip deformation.

Tenon Tip Technology

The i-Pro's patented Tenon Tip Technology increases the "sweet spot" of the shaft by transferring energy from the tip directly into the carbon fiber core. This results in a more solid hit that maximizes the accuracy of your shot.

Triple-Layer Carbon Fiber Core

The i-Pro's Triple-Layer Carbon Fiber Core extends the full-length of the shaft (from ferrule to joint), stabilizing the entire shaft for absolute control and predictability.

WHAT IT DOES:

- Increases radial consistency
- Reduces vibration and virtually eliminates the inconsistencies found in a traditional maple shaft
- Provides a straighter cue ball path, minimizing the need to compensate for cue ball squirt

Radial Consistency

Radial consistency is the shaft's ability to reproduce the same results, regardless of its orientation. This means the shaft will perform more predictably from shot to shot. The i-Pro and i-Pro Slim's Octadic Laminated Shaft Construction, combined with their Triple-Layer Carbon Fiber Core, makes them the most radial consistent wooden shafts we've ever made.

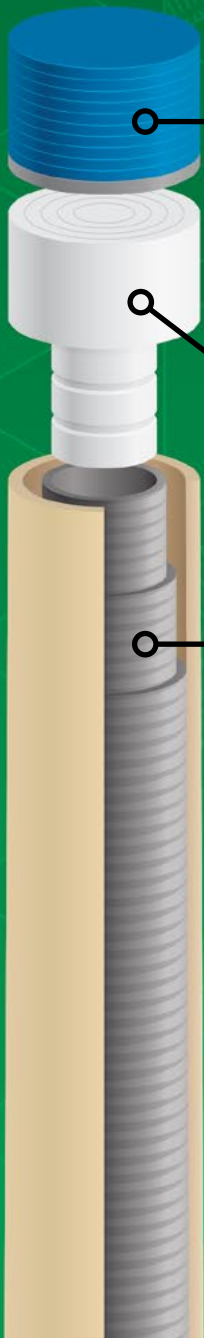

Made in the U.S.A.

Intimidator **i-SHAFTS**

MORE ACCURACY. MORE CONTROL. MORE CONSISTENCY.

Navigator Premium Tips

Navigator tips are made using 100% Japanese pigskin leather. They are laminated and pressed utilizing a specialized method, which features a proprietary adhesive that won't affect the leather's hardness. This prevents oxidation, meaning the tip won't get harder after short usage.

Tenon Tip Technology

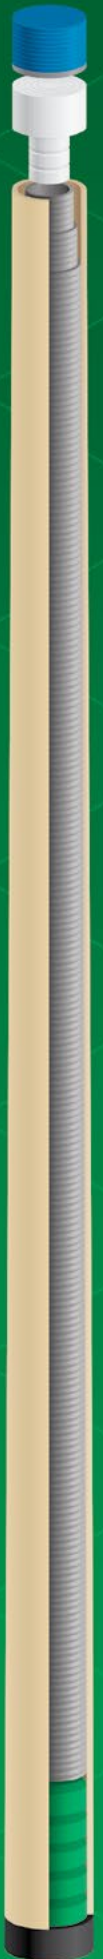

The i-Shaft's patented Tenon Tip Technology increases the "sweet spot" of the shaft by transferring energy from the tip directly into the carbon fiber core. This results in a more solid hit that maximizes the accuracy of your shot.

Triple-Layer Carbon Fiber Core

The i-Shaft's Triple-Layer Carbon Fiber Core extends the full-length of the shaft (from ferrule to joint), stabilizing the entire shaft for absolute control and predictability. This technology increases radial consistency, reduces vibration and virtually eliminates the inconsistencies found in a traditional maple shaft.

Radial Consistency

Radial consistency is the shaft's ability to perform the same way on every shot, regardless of its orientation. The i-Shaft's Triple-Layer Carbon Fiber Core technology will consistently provide a straighter cue ball path, minimizing the need to compensate for cue ball squirt.

Made in the U.S.A.

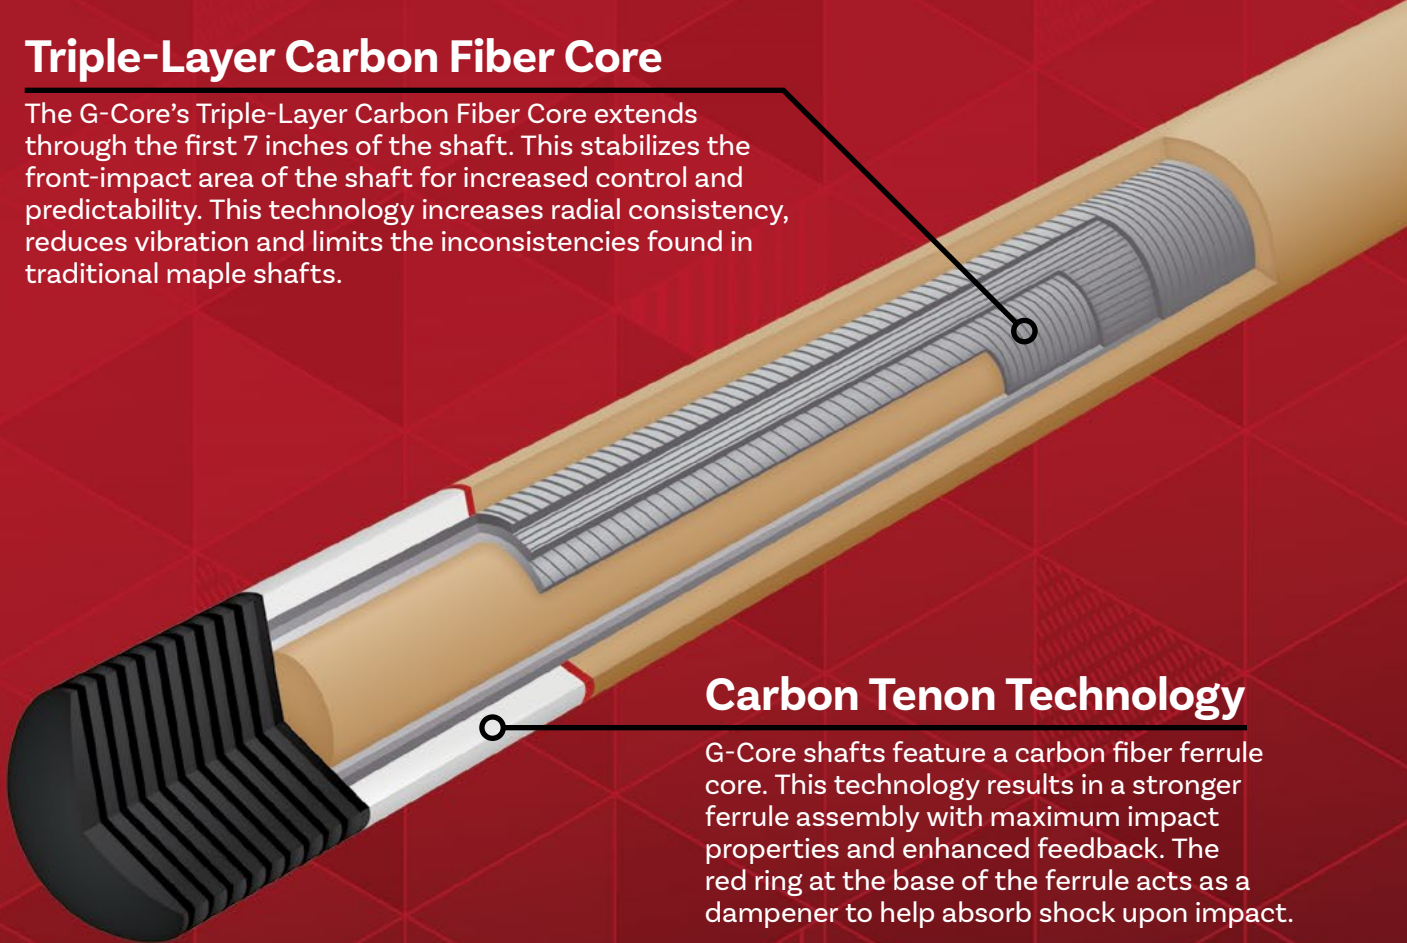

G-CORE™

Hardcore Performance. Traditional Feel.

Triple-Layer Carbon Fiber Core

The G-Core's Triple-Layer Carbon Fiber Core extends through the first 7 inches of the shaft. This stabilizes the front-impact area of the shaft for increased control and predictability. This technology increases radial consistency, reduces vibration and limits the inconsistencies found in traditional maple shafts.

Carbon Tenon Technology

G-Core shafts feature a carbon fiber ferrule core. This technology results in a stronger ferrule assembly with maximum impact properties and enhanced feedback. The red ring at the base of the ferrule acts as a dampener to help absorb shock upon impact.

Navigator Black Tip

Navigator Black tips feature multiple layers of Japanese pigskin leather that are assembled using a proprietary adhesive. This prevents oxidation, meaning the tip won't get harder after short usage. They are the most adaptable tips in the Navigator line, allowing players to shape and mold the tip over time to fit their play style.

Radial Consistency

Radial consistency is the shaft's ability to perform the same way on every shot, regardless of its orientation. The G-Core's Triple-Layer Carbon Fiber Core technology will consistently provide a straighter cue ball path, minimizing the need to compensate for cue ball squirt.

H-SERIES

FEATURING OUR **VBP**
WEIGHT SYSTEM

Our H-Series line features a fully-adjustable Variable Balance Point (VBP) weight system. This breakthrough is made possible by our patented new technology that combines a full-length carbon fiber core with a rail which the weights can be repositioned forward or backward inside the cue. No other cue allows you to have this much control over both the weight and balance.

Learn more at mcdermottcue.com/h-series.

ENGAGE BUTT PLATE SYSTEM

Standard on the H-Series is the newly-engineered Engage butt plate system, which features an internal threaded construction. This allows you to easily remove the bumper and access the VBP weight system.

The Engage butt plate system is also compatible with our Engage Cue Extension that can be twisted into place in just one full turn.

Check out the Engage Cue Extension on [PAGE 104](#).

UPGRADE

from a G-Core to a

DEFY

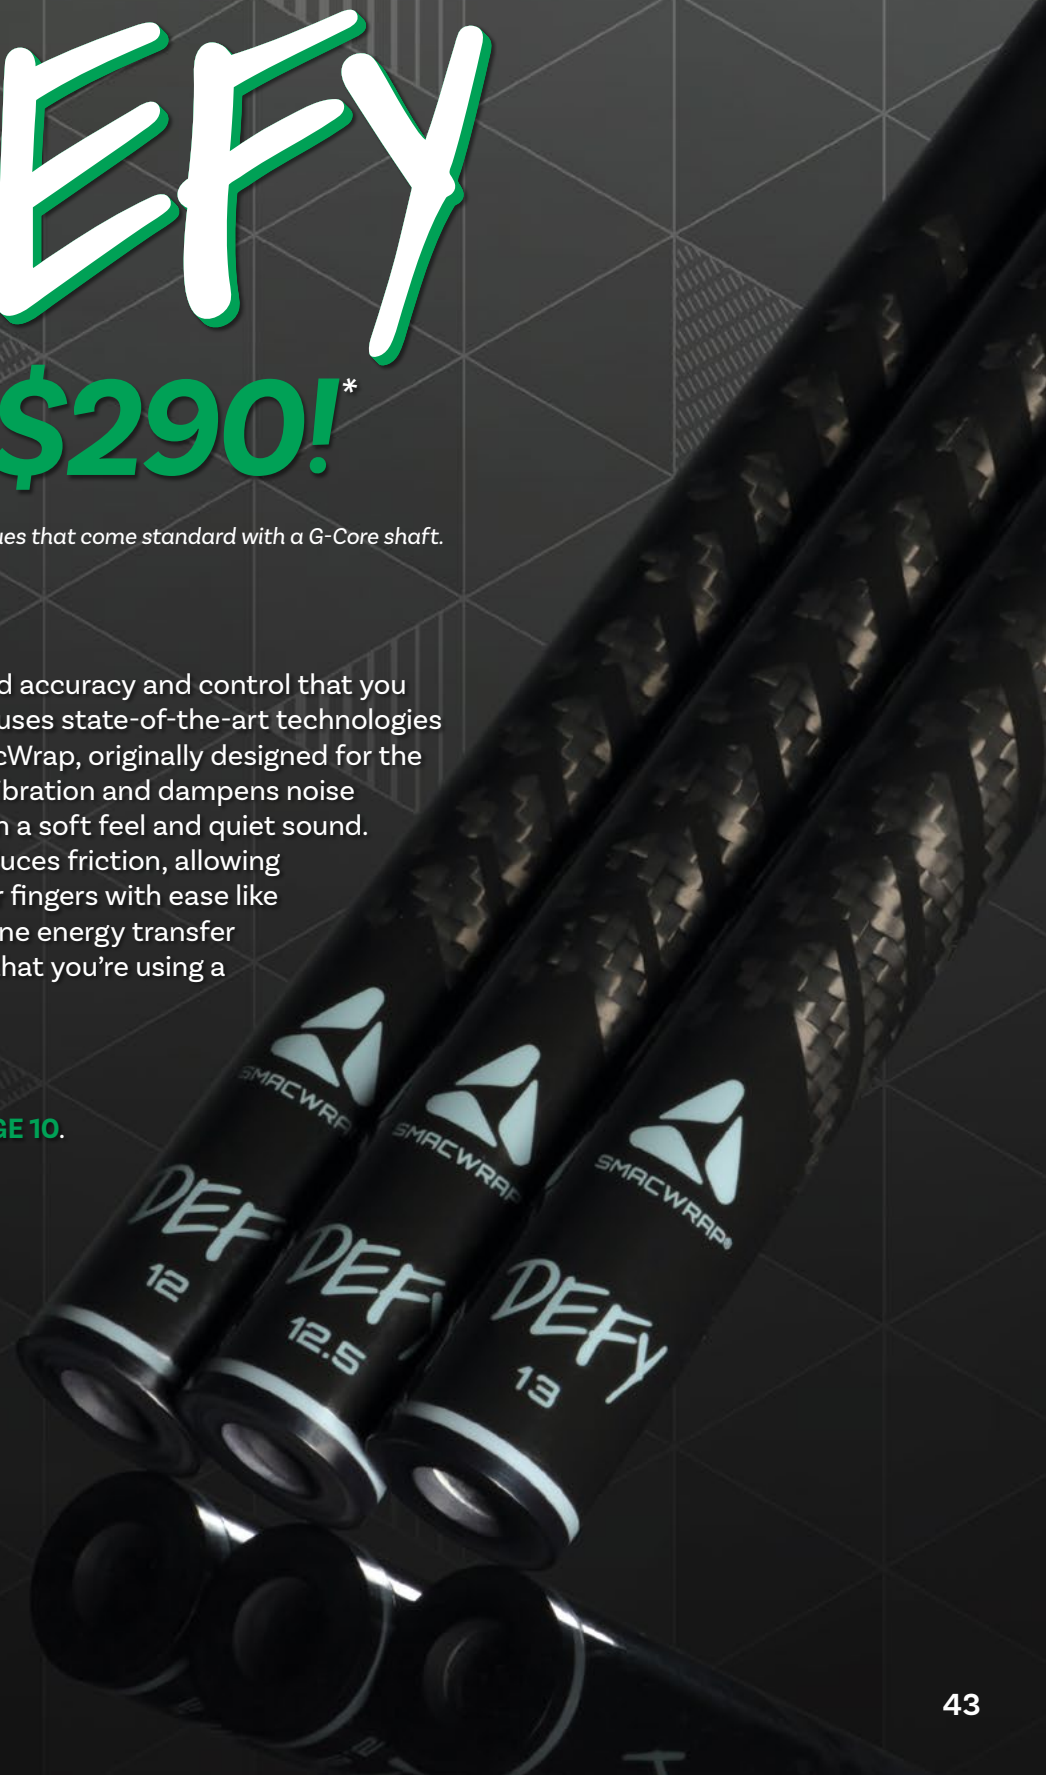

for **\$290!***

**Only applies to cues that come standard with a G-Core shaft.*

Defy gives you the unparalleled accuracy and control that you expect from carbon fiber, but uses state-of-the-art technologies to shatter its limitations. SmacWrap, originally designed for the aerospace industry, absorbs vibration and dampens noise resulting in a confident hit with a soft feel and quiet sound. Our super-smooth coating reduces friction, allowing the shaft to glide through your fingers with ease like a wood shaft. Only Defy's insane energy transfer and accuracy will remind you that you're using a carbon fiber shaft.

Learn more about Defy on [PAGE 10](#).

Standard length: 29"
Also available in 30" & 31"

Custom Transfer Art

Add your own graphics to a cue! Send us your own original artwork and we can apply it to the forearm and/or sleeve of a white pearl cue.

Custom transfers can only be applied to white pearl painted cues. Original artwork may be subject to a \$75 fee. High-resolution artwork files must be supplied electronically in JPG or TIF format. Email artwork and/or inquiries to sales@mcdermottcue.com.

Dimensions

Forearm: 2.25" wide x 10" tall at 300dpi

Sleeve: 3.75" wide x 2.25" tall at 300dpi

NAVIGATOR BLUE IMPACT SNOOKER TIPS

Navigator Blue Impact Snooker tips feature 11 thinner layers of Japanese pigskin leather. This allows them to perform like a one-piece pressed tip, but with more consistency and a much longer lifespan.

30-0241 \$14 each (11mm)

McDermott Carom Cues

Stinger

BREAK/JUMP CUES

PATENTED TIP/FERRULE TECHNOLOGY

The tip features a "stinger" stem that projects downward through a hole in the center of the ferrule. On impact, the shock of the hit goes to the center of the tip and down the "stinger" stem, transmitting the impact directly to the center of the shaft. This results in a very efficient, precise hit.

ENORMOUS SWEET SPOT

Stinger technology takes the hit energy to the center of the shaft, regardless of where you hit the tip. Our tip can be shaped flatter than a typical break cue's tip. The flatter profile causes the Stinger tip to have a huge sweet spot. You can mishit and still get the result you intended.

SLEDGEHAMMER

DEDICATED TO BREAKING BALLS

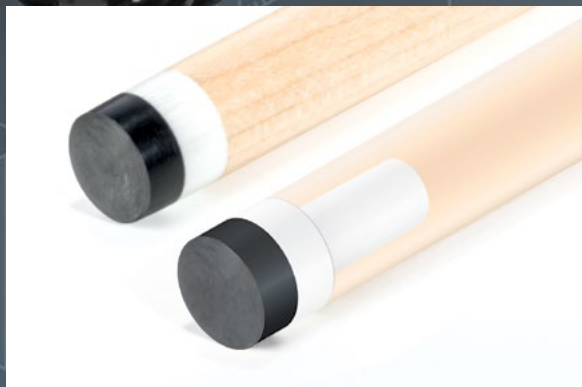

Sledgehammer is one of the most recognized and respected names in dedicated break cues. The patented ferrule technology found in the SH1 optimizes energy transfer, resulting in extreme power and accuracy. Known to many as the hardest and most solid-hitting break cue on the market, the Sledgehammer simply destroys a rack, leaving your competition speechless.

Easily attaches to cases featuring a D-ring

Add a second strap to make your existing case a backpack case!

Shoulder Strap for Cases

Looking for a more comfortable strap for your case? Look no further! This padded case strap features a wide cushion that won't dig into your shoulder. It attaches easily to cases featuring a D-ring* and adjusts in length up to 45" to ensure a comfortable fit.

75-0946 \$33 each

*Your case must have a D-ring for the shoulder strap to clip into.

Training Products

Ghost Ball Aim Trainer

The Ghost Ball Aim Trainer is simple to use and delivers powerful results! Through visual reinforcement, this hands-on product takes the confusion out of two of the most difficult aspects of the game: How and where to aim – and how to leave the cue ball in position for your next shot.

In easy-to-understand terms, you'll learn the "ghost ball" method of aiming – a highly-accurate technique used by pros and master instructors. You'll see improvement immediately on cut shots, cue ball control, position play, and more. The visual nature of the Ghost Ball Aim Trainer quickly trains your minds-eye to clearly see the aiming point, and to see where the cue ball will go once it hits the object ball. This is called "position play," and learning or mastering how to leave the cue ball in position for your next shot will greatly enhance the fun you have playing pool.

These and other topics are covered in the included Lesson Booklet are designed to let you learn basic to advanced level techniques at your own pace.

75-GAT **\$27**

42" Training Cue

The Training Cue features a full size and weight cue ball attached to the tip. A perfect training tool for kids and beginners to prevent mis-cues and damaging the table cloth. Teaches proper ball contact to improve shot accuracy and consistency.

- Cue ball attached to one-piece cue
- Prevents mis-cues & scratches to table cloth
- Teaches appropriate ball contact
- Perfect for kids and beginners
- 42" length

TRCUE42 **\$75**

Jump Training Ball

Learn how to jump, jump-follow, jump-draw & jump-masse with the easy to use McDermott Jump Trainer. Simply line up your shaft to the guide line and hit the clover.

NAVIGATOR

PREMIUM TIPS & CHALK

Navigator Alpha Pro, Automatic, Black and Blue Impact Pro tips are made using 100% Japanese pigskin leather. They are laminated and pressed utilizing a specialized method, which features a proprietary adhesive that won't affect the leather's hardness. This prevents oxidation, meaning the tip won't get harder after short usage.

NAVIGATOR

Automatic

Diameter: 14mm
Layers: 10
Leather: Japanese Pigskin
Hardness: Super Soft, Soft, Medium or Hard

Navigator Automatic tips feature pure Japanese pigskin leather with no artificial coloring added. Each tip goes through a month-long manufacturing process that seals in the ideal qualities of the leather, providing a softer, more consistent hit with almost no deformation.

30-0248 \$26 each

NAVIGATOR

BLACK

Diameter: 14mm
Layers: 10
Leather: Japanese Pigskin
Hardness: Super Soft, Soft, Medium or Hard

Navigator Black tips feature 10 layers of Japanese pigskin leather that are assembled using a proprietary adhesive. This prevents oxidation, meaning the tip won't get harder after short usage. They are the most adaptable tips in the Navigator line, allowing players to shape and mold the tip over time to fit their play style.

30-0240 \$26 each

Color-coded by hardness for easy identification

Alpha Pro Max
 30-0273-PM \$27 each

Alpha Pro Soft
 30-0273-PS \$27 each

NAVIGATOR

ALPHA

PRO

Diameter: 14mm
Layers: 9
Leather: Japanese Pigskin
Hardness: Soft or Max

Navigator Alpha Pro tips feature a new, enhanced 9-layer Japanese Pig leather construction that includes a specially-formulated bottom layer. The harder leather at the base of the tip improves stability and enhances feedback, while decreasing tip deformation.

Within the Navigator tip line, Alpha Pro falls in the midrange for hardness and was created through a proprietary process of adjusting the leather fiber firmness in each layer. The higher compression of the leather will maximize grip force (contact time on the cue ball), which increases cue ball spin when English is applied.

A fiber barrier has been added to each tip to prevent installation adhesives from causing chemical changes that may compromise the leather's integrity.

Blue Impact Pro Max
30-0272-PM \$27 each

Blue Impact Pro Soft
30-0272-PS \$27 each

NAVIGATOR

BLUE IMPACT PRO

Diameter: 14mm
Layers: 9
Leather: Japanese Pigskin
Hardness: Soft or Max

Navigator Blue Impact Pro tips feature a new, enhanced 9-layer Japanese Pig leather construction that includes a specially-formulated bottom layer. The harder leather at the base of the tip improves stability and enhances feedback, while decreasing tip deformation.

Within the Navigator tip line, Blue Impact Pro is slightly on the harder end of the scale and was created through a proprietary process of adjusting the leather fiber firmness in each layer. The lower compression of the leather will minimize grip force (contact time on the cue ball), which increases cue ball speed and acceleration.

A fiber barrier has been added to each tip to prevent installation adhesives from causing chemical changes that may compromise the leather's integrity.

Blue Impact Snooker
30-0241 \$14 each

NAVIGATOR

BLUE IMPACT SNOOKER

Diameter: 11mm
Layers: 11
Leather: Japanese Pigskin
Hardness: Super Soft, Soft, Medium or Hard

Navigator Blue Impact snooker tips feature 11 thinner layers of Japanese pigskin leather. This allows them to perform like a one-piece pressed tip, but with more consistency and a much longer lifespan.

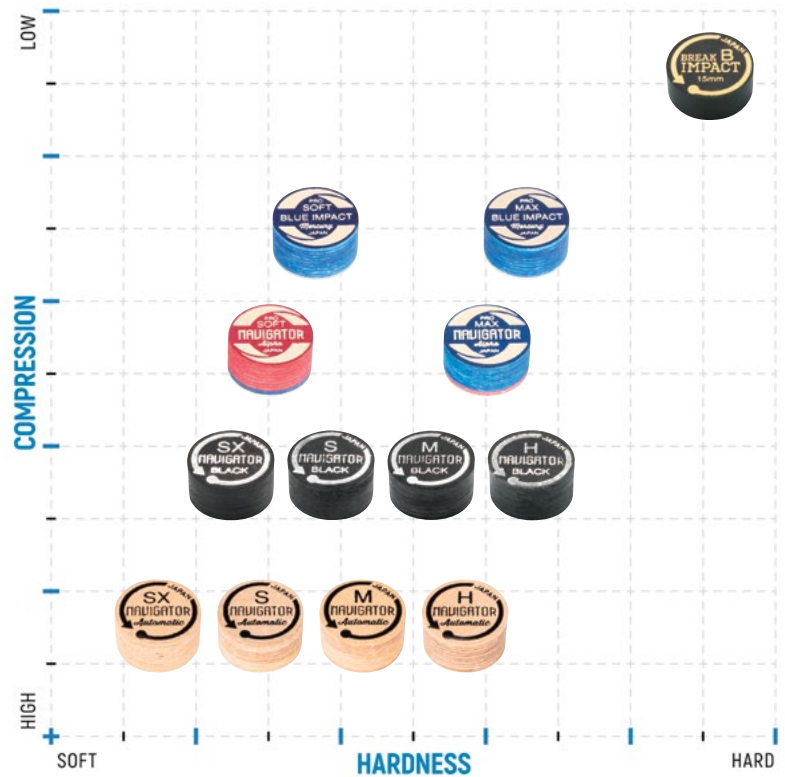

Diameter: 15mm
Construction: Hybrid Phenolic
Hardness: Ultra-Hard

NAVIGATOR

BREAK IMPACT

Navigator Break Impact is a hybrid phenolic break tip. Most phenolic tips are designed to generate power, but at the cost of cue ball control. The Break Impact tip's hybrid construction provides tremendous cue ball control without sacrificing power. This makes it ideal for breaking and jump shots.

30-0244 \$24 each

NAVIGATOR

TIP CRYSTAL

Navigator Tip Crystal extends the life of your tip by hardening the outer edge. This helps reduce mushrooming.

75-NAV-8 \$26

NAVIGATOR

CHALK

Navigator Chalk is formulated from a special compound designed to increase friction, allowing you to generate more spin and maintain better control.

- Won't leave chalk residue on the cue ball or table cloth
- Goes on smooth with less powdery debris
- Protective silicone cover included

75-NAV-7 \$26 each

Cue Repair & Refurbishing

We offer professional cue servicing and refurbishing at our factory in Menomonee Falls, WI. This includes new shafts, rewraps, refinishing, replacing damaged components and much more. Our knowledgeable, experienced repair department is trained and certified at cue servicing. Each cue receives the finest care from our expert staff. Visit mcdermottcue.com/repair for more information about refurbishing your cue.

Warranty & Lifetime Maintenance Plan

When it comes to a quality product and superior customer service, we set the standard. Our unparalleled coverage demonstrates not only our confidence in our cues, but also our ongoing commitment to you.

McDermott, Stinger & Sledgehammer Lifetime Warranty

Lifetime warranty covers manufacturing defects, including warpage.

Star Warranty

Limited lifetime warranty covers manufacturing defects, excluding warpage.

McDermott Lifetime Warranty

We warrant our McDermott pool cues to be free of defects in material and workmanship – including warpage.

We do not warrant our products against:

- › normal wear and tear including tip, finish, wrap, and bumper
- › misuse, abuse or mishandling
- › modification or improper maintenance performed by third parties
- › damage caused by exposure to extreme temperatures or humidity

Our McDermott Lifetime Warranty applies only to the original purchaser/owner of the cue and must be purchased from an authorized McDermott dealer. All warranty claims must include the complete cue and are subject to evaluation at our facility prior to approval. Products that do not qualify for the McDermott Lifetime Warranty can be serviced by McDermott for a fee. To obtain warranty service on a McDermott product, return the product to an authorized McDermott dealer or directly to McDermott along with a copy of your original sales receipt.

Visit mcdermottcue.com/warranty for complete warranty claim instructions or to find an authorized McDermott dealer.

Disclaimer: This warranty is in lieu of all other express warranties. McDermott disclaims all warranties for products that are purchased from sellers other than authorized retailers or distributors. McDermott's warranty against warpage was introduced in 2004. Cues manufactured prior to 2004 do not qualify. Prices subject to change without prior notice.

Lucky, Cue Kit & Youth Cue Warranty

Three-year limited warranty covers manufacturing defects, excluding warpage.

Case Warranty

Three-year limited warranty covers manufacturing defects.

McDermott Lifetime Maintenance Plan

Maintenance is one of many things to consider when buying a pool cue. McDermott cues are protected by one of the most comprehensive maintenance programs in the industry. Send us your cue and we'll put it through our Multi-Point Inspection Process to ensure it's ready for action. *Return S&H applies.*

Multi-Point Inspection Process

- › Tip installation (tip purchase required)
- › Clean ferrule
- › Sand/clean/seal shaft
- › Re-press linen wrap
- › Adjust weight upon request
- › Check structural integrity
- › Overall cosmetic evaluation

Visit mcdermottcue.com/lmp to take advantage of the Lifetime Maintenance Plan.

MACH 1

CARBON FIBER BREAK CUE

FEATURING OUR
VBP WEIGHT
SYSTEM

Introducing the Vanquish Mach 1 – our most technologically-advanced break cue. This state-of-the-art carbon fiber butt features our patented Variable Balance Point technology, which allows you to fine tune the weight and balance of your cue. This allows you to set the cue to be front-weighted, rear-weighted or anywhere in between! The Mach 1 comes equipped with our newly-engineered Defy break shaft with a Navigator Break Impact tip and phenolic ferrule for maximum power and control.
